

Sickle Cell Disease Fertility Preservation Grant

For individuals living with sickle cell disease (SCD), transplant is the only established curative treatment. As part of the transplant process, SCD warriors undergo a conditioning regimen that can impact fertility. Insurance providers often do not cover costs related to fertility preservation and there is extremely limited funding available to individuals with sickle cell disease.

With funding generously provided by the Be The Match Foundation®, the National Marrow Donor Program® (NMDP)/Be The Match® and their partner Sickle Cell Health Reproductive Education Directive (SCRED) can provide financial help for SCD warriors who want the opportunity to build their families post-transplant.

Eligibility requirements

- Diagnosis of sickle cell disease
- Patient is pre-transplant and transplant team has identified a donor or cord for collection
- Household monthly net (take-home) income does not exceed 350% of the federal poverty line
- Transplant center team submits application affirming patient's eligibility and need
- Fertility preservation consultation must be completed or scheduled

Grant coverage inclusions

- Oocyte retrieval and cryopreservation
- Embryo culture, fertilization and cryopreservation
- Ovarian tissue freezing (pediatric)
- Semen analysis and freezing (sperm banking)
- Testicular cryopreservation
- Storage fees
- Medications

Grant specifics

- The Sickle Cell Disease Fertility Preservation Grant can give a limited number of qualified patients a grant of up to \$10,000 or up to 10 years of storage whichever is lesser
- Funds can be issued to fertility clinics or to the patient
- If funds are being issued to the fertility clinic, their W9 form is required
- To apply, please reach out to Be The Match Patient Financial Assistance:
